

## Lithium Ion Battery Super Reviver for Segway format batteries

### Features:

- Revives most;
  - Depleted\* Lithium Ion Battery Packs.
  - Stopped^ Lithium Ion Battery Packs.
- Auto operation, designed for simplicity of use.
- User technical expertise is not required.
- Battery pack remains sealed and intact.
- Hazardous shipping & certification avoided.
- 12 month product warranty.
- Global compatibility, operates worldwide.

### Package Includes:

- Complete Battery Super Reviver.
- Illustrated instructions.

### Background Information:

The Lithium Ion batteries fitted to Segway PTs are capable of storing a lot of energy. This amount of energy may be dangerous in uncontrolled circumstances. We observe that Segway has taken a number of 'controls' to ensure that batteries are always safe.

Some of these 'controls' cause batteries to inconveniently cease functioning.

\* This Battery Super Reviver is designed to safely revive depleted ( have not been charged for an extended time ) batteries.

^ This Battery Super Reviver is designed to safely revive stopped ( have simply and seemingly inexplicably just stopped working, even whilst on a charger ) batteries.

### Likely Expectations:

Complex battery products may fail in a number of ways. **Many batteries can be revived, but not all batteries can be revived.** Realistic expectations from this Battery Super Reviver are:

- ✓ **Many 'depleted' batteries can be revived.**
- ✓ **Many 'stopped' batteries can be revived.**
- ✗ **Failed or otherwise broken or damaged batteries CANNOT be revived.**
- ✗ **Batteries with damaged internal cells or damaged electronics CANNOT be revived.**
- ✗ **Worn out ( reached end of their life ) batteries CANNOT be revived.**

After revival, a number of tests are performed to ascertain, beyond any reasonable doubt, that the revived battery is safe to use.

## **Proven Global Success:**

DGB International, Lithium Ion Battery Revivers have been successfully used globally, including in:

- Asia Pacific
- Europe
- North America
- South America
- Africa
- Central America
- Middle East
- Australia

Our customers tell us that the most appealing characteristics of the DGB International, Battery Reviver products include;

- The ability to easily solve the battery problem locally, rather than having to ship heavy and hazardous batteries to a distant 'laboratory or solution location'.
- The comfort and confidence that comes with a detailed procedure.
- Robust and safe to use electrical connectors.

## **Ownership Benefits for Dealers:**

- Ability to assist customers promptly, on-site.
  - Saves time.
  - Saves transport costs.
  - Saves paperwork & record keeping.
  - Keeps customers happy.
  - Enhances dealership reputation.
- Ability to revive depleted stock batteries.
- Enables additional income streams.
  - Offer 'revival' services to owners.
  - Increases value of PT trade-ins.
  - Attracts customers to your store and gains the opportunity to up-sell additional items.

## **Customer Feedback:**

- "I earned the price back on the first day".
- "I expect to use this almost every day".
- "Appears to have worked great with the 3 batteries we tried initially. We are definitely excited."
- "We revived 24 out of 27 'dead' batteries."

## **Legal Disclaimer:**

This is an independent product, and is neither supported nor backed by Segway Inc.

## **Forward Looking Statement:**

We continually strive to improve existing products, and to release new products. All customer feedback is welcomed.

We expect to release further 'Battery Reviver' range products in the foreseeable future.

Available internationally & locally from:

## **Battery Guidelines:**

This product is specifically designed to revive Li-ion batteries that are used for the Segway PT. Use for any other application is discouraged.

AA, AB, AC series batteries:  
may be used on generation 1, Segway HT only.

A4, AD, AE, AF, AG and AH series batteries:  
may be used on either generation 1 or 2 HT / PTs.

Users should charge all their stored batteries (revived or otherwise) at least once per month.

## **Shipping Information:**

Package Dimensions:

31 x 23 x 12 cms                      12½ x 9 x 4½ inches

Package Weight:

1.4 Kg                                      3 lb.
